

## **GREEN CAMPUS POLICY**

The College has taken ample measures to keep its campus a green campus.

- The College permits only a limited number of automobiles inside the campus. The College has a proper parking facility both for students and staff within the campus.
- The College encourages the staff members and students residing nearby to commute by bicycles. A large portion of the students and faculty members use public transportation for commutation.
- The campus has wide, well-maintained precast concrete block pavement roads. Parking areas are provided and marked. The college takes efforts to reduce the use of paper related to official works.
- College is trying to shift towards a paperless working environment in the administrative works. The campus is declared as a plastic-free area.
- Use of plastic bags and cups (below 50 micron) are prohibited inside the campus. In the canteens stainless steel plates and cups are encouraged. Measures are taken to spread awareness about the hazards of plastics.
- The College has taken steps towards making the office a paperless one. In the administrative office, the accounts and academic information are managed electronically. The College has a sustainable and environmental friendly waste disposal mechanism.
- The waste water recycling process within the campus reuses the waste water generated in the water purifiers effectively. The College has solar energy panels which contribute to sustainable energy usage.
- The college has taken plenty of measures to increase the greenery within the campus. More than 50% of the total area is covered with trees and lawns. The Garden and lawns are maintained by the Department under vigilant supervision.
